IMT[®] CMD.CTRL[™]

Take Control of Your Productivity, Reliability and Safety

With the IMT[®] CMD.CTRL[™] system, you are fully equipped to handle crane and body operation remotely. The new IMT control system comes standard with your IMT Dominator[®] mechanics truck and combines strong, reliable hardware with flexible, intuitive software to give operators a productive, user-friendly experience.

FEATURES & BENEFITS

Core components of the new system include convenient cab controls, service body compartment controls and the wireless, remote-control system.

> SAFETY

- An advanced Load Moment Indicator (LMI) provides the operator information about the load and has safety checks and warnings from the remote for the hydraulic powered stabilizer adjustment.
- An ergonomically designed remote provides ease of use and comfortable operation.
- Mechanics can operate safely and productively with the ability to strategically park the truck and operate equipment from a remote jobsite location.
- The system records crane operational data.

> PRODUCTIVITY

- The crane, body and compressor wireless remote control allows operators to operate the entire truck function remotely.
- Remote controls include hydraulic powered stabilizer operation functions.
- An advanced LMI provides improved operator awareness of load capacity.
- Remote icons help with ease of use and quick recognition.
- Programmable features offer operator customization.
- Operators can individualize multiple operations, including flood lights, compartment lights, etc.

> RELIABILITY

- Redundancies in the system provide back-up so operators can still carry out the job, even if electronics fail.
- An IP67-rated crane compartment display and remote control module ensures protection from the elements.
- Improved, remote and easy-to-understand diagnostics reduce error in troubleshooting.

INSIDE THE IMT[®] CONTROL SYSTEM

An operator with visual contact with the truck while e-brake is on can remotely:

- Start and stop the truck engine or auxiliary power unit.
- Engage and disengage the PTO and pump.
- Turn compartment, flood or work lights on and off.
- Deploy, stow and adjust hydraulic powered stabilizers.
- Engage the air compressor.
- Perform all crane functions.

SOFTWARE BENEFITS:

Make sure you always have the best system at your service. The IMT CMD.CTRL™ system offers entirely remote-controlled operations and is designed to provide you the best remote system for your work truck today while keeping it prepped for tomorrow.

INDUSTRY LEADING:

IMT CMD.CTRL™ technology takes the industry standard to a new level, allowing all components to be operated remotely from the same system. This ergonomic, one-stop-shop for control incorporates standard features to provide operators with the safety, productivity and reliability they deserve. With advanced LMI, improved crane diagnostics, stability sensors and multiple lighting options, operators can trust the CMD.CTRL™ system to keep them well-equipped for any job.
